

Integrated company policy

In the everyday operation of Fermentia Microbiological Company beyond the quality management, environment awareness becomes a very important field as well. We apply a customer and quality oriented, environment friendly approach to carry out fermentation projects at high technical and quality levels to satisfy our customers' demands. Priority attention is given to the preservation and protection of our environment by continuously improving our ISO14001 environment management system.

All of our products and services offer biological alternatives (instead of chemical ones) for our customers' needs. This way our environmentally aware clients can build their enterprises to preserve their macro environment for future generations.

Company management considers the continuous development of our product and service quality and the improvement of the efficiency of our integrated management system as a major objective. We feel a strong commitment to maintain environmental awareness and sustainable development by continuously advancing our company.

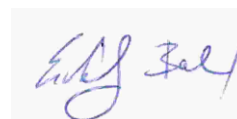

To achieve our objectives the following will be maintained:

- Our activities are organised and operated in line with the standards for ISO 9001:2015 and ISO 14001:2015 for quality and environment management system
- Quality assurance of assets and human resources are maintained and continually updated
- Our suppliers' products and services are regularly measured, analysed and evaluated according to our quality and environment oriented management system
- We supervise and amend our operation regarding market requirements, technical development and our quality and environment friendly management system
- We fulfil our obligations to comply to our customers' requirements by maintaining our high quality and optimal efficiency
- We provide personal oriented training and opportunities for technical advancement to our colleagues in order to use state-of-the-art facilities and technologies to meet our customers' requirements.
- We are cooperating with biotech faculties of universities and participating in conferences and workshops to maintain our state-of-the-art expertise
- We are enhancing the performance of our management system with the method of effective error prevention and continuous development.

These objectives help us to achieve our target to meet the requirements of our customers, to improve our market positions and to increase the number of contented customers.

All employees at Fermentia are aware that beyond supplying our customers' requirements and achieving our company's objectives they are working on their personal expertise and social welfare.

Budapest, 11th October, 2017.
